Eyelet inserting device Type A 040/R

Specification:

- Dimensions: 320 x 600 x 600 mm
- Weight: ca. 20 kgs
- Connection: 230 V / 50 Hz / 100 W
- Compressed air: 3,5 to 4,0 bar
- Loose eyelets: 300 to 400
- Capacity: one per second

Form of the components:

Function:

The loose eyelets are automatically moved into the device by a circle conveyor (vibrator) and with a compressed air cylinder they are punched into the pcb. For that the pcb is manually held to the setting position. The setting process is triggered by a sensing pin. This inserting device processes all customary in trade eyelets (also double tongues), which can be provided for the device by a circle conveyor.
